

ISU Chemical Instrumentation Facility
External Usage Charges – FY '18

This is a list of current prices for non-ISU, non-state institution, affiliated users, and effective 8/01/2017. These prices are approximately 3.0 times higher than the internal ISU rates. Rates for state-sponsored colleges and universities are 1.5 times higher than internal rates. Collaborative outreach projects are billed at the internal rate. The charge for "direct staff time" relates to samples submitted for analysis when training and student operation are the norm, and all other services not defined in the rate structure.
